### LIP Harmonised Formula Product Range Update January 2010

LIP Diagnostic Services, part of Fannin Ltd is pleased to announce the launch of additional product lines suitable for Harmonised Microbial Limit Tests as outlined under section 2.6.13 of the European Pharmacopoeia, version 6.

This notification details current product lines. Batches supplied after March 1st will have been manufactured using commercially available dehydrated base media, the formulations of which are compliant with those specified for Harmonised Method testing. The performance of these harmonised formulations is comparable to previously used base media, and all batches produced are subject to the same manufacturing processes and quality control tests prior to release for sale.

Product codes, descriptions and units sizes are detailed below.

| Product                                                         | Catalogue number | Format                                               | Unit size           |
|-----------------------------------------------------------------|------------------|------------------------------------------------------|---------------------|
| EE Broth Mossel<br>Harmonised Formula                           | W14244           | 100ml, PP Bottle                                     | 1 bottle            |
| EE Broth Mossel<br>Harmonised Formula                           | W14209           | 1L, PP Bottle                                        | 1 bottle            |
| EE Broth Mossel<br>Harmonised Formula                           | W14435           | 500ml PP Bottle                                      | 1 bottle            |
| MacConkey Broth<br>Harmonised Formula                           | W14246           | 100ml, PP Bottle                                     | 1 bottle            |
| MacConkey Broth<br>Harmonised Formula                           | W14438           | 500ml, PP Bottle                                     | 1 bottle            |
